

CLAIM AMENDMENTS:

Please cancel Claims 14 and 18-22 and amend Claims 13 and 15-16 as follows:

1. - 12. (Cancelled).

13. (Currently Amended) An image processing apparatus comprising:

a reproducing unit which reproduces a part of a moving image from a storage medium during a predetermined reproduction time; and

a determining unit which determines whether a first button is pressed before the predetermined reproduction time is passed,

wherein said reproducing unit reproduces not only ~~[[the]]~~ said part of the moving image but also ~~starts reproduction of~~ reproduces the remaining part of the moving image, if said determining unit determines that the first button is pressed before the predetermined reproduction time is passed, ~~[[and]]~~

wherein ~~the image processing apparatus~~ said reproducing unit starts ~~selection reproduction~~ of a next still image or moving image ~~in order to reproduce the next still image or moving image from the storage medium~~, if reproduction of the moving image reaches the end of the moving image~~[[.]]~~.

wherein said determining unit determines whether a second button is pressed during the reproduction of the remaining part of the moving image, and

wherein said reproducing unit terminates the reproduction of the remaining part of the moving image and then starts reproduction of a next still image or moving

image, if said determining unit determines that the second button is pressed during the reproduction of the remaining part of the moving image.

14. (Cancelled)

15. (Currently Amended) An image processing apparatus according to Claim 13, further comprising:

a display unit which displays the part of the moving image reproduced from the storage medium,

wherein said display unit displays not only ~~[[the]]~~ said part of the moving image but also displays the remaining part of the moving image, if said determining unit determines that the first button is pressed before the predetermined reproduction time is passed.

16. (Currently Amended) An image processing apparatus according Claim 13, further comprising:

~~[[an]]~~ a video signal output unit which outputs the part of the moving image reproduced from the storage medium,

wherein said video signal output unit outputs not only ~~[[the]]~~ said part of the moving image but also outputs the remaining part of the moving image, if said determining unit determines that the first button is pressed before the predetermined reproduction time is passed.

17. (Previously Presented) An image processing apparatus according to Claim 13, wherein the image processing apparatus includes a digital camera or a digital video camera.

18.-22. (Cancelled)
